## 11.03 Pipe, hose & fittings

Pipes and fittings are essential components for the flow of milk and other dairy products in a traditional dairy processing plant. They are used to transport the products from one point to another, such as from the storage tanks to the processing equipment or from the processing equipment to the packaging line.

It's important for the pipes and fittings to be properly designed, installed, and maintained to ensure the safety and quality of the dairy products. Proper sanitation is critical to prevent the growth of harmful bacteria and ensure that the products meet food safety standards.

Dairy processors should work with qualified engineers and technicians to design and install their piping, and follow established sanitation procedures and best practices to maintain the cleanliness and integrity of the system.

### 11.03 - Technical data – Hose and fittings

Qty	ID	Description	Price - €	Total - €
	PGP-114.30	1"1/4 x d.30 mm 90° NYLON HOSE CONNECTION		
	PGI-032.30	DIN 32 x d.30 mm STAINLESS STEEL HOSE CONNECTION		
	PGI-040.30	DIN 40 x d.30 mm STAINLESS STEEL HOSE CONNECTION		
	PGI-040.40	DIN 40 x d.40 mm STAINLESS STEEL HOSE CONNECTION		
	PGI-050.30	DIN 50 x d.30 mm STAINLESS STEEL HOSE CONNECTION		
	PGI-050.40	DIN 50 x d.40 mm STAINLESS STEEL HOSE CONNECTION		
	PGI-050.50	DIN 50 x d.50 mm STAINLESS STEEL HOSE CONNECTION		
	PGI-050.60	DIN 50 x d.65 mm STAINLESS STEEL HOSE CONNECTION		
	PGI-065.30	DIN 65 x d.50 mm STAINLESS STEEL HOSE CONNECTION
